

FARES BOUAFIF

AI-Assisted Systems Builder / Automation / IT Support

Dubai, United Arab Emirates | +971 58 578 0604 | bouafffares59@gmail.com | linkedin.com/in/fares-bouafif

Languages: Arabic, English, French

PROFESSIONAL SUMMARY

AI-assisted systems builder with hands-on experience designing websites with AI, hosting web projects, creating database-backed tracking, automating workflows and building UMS for hotel operations. Combines computer science coursework, practical IT support and live operations experience for junior AI automation, web systems, business systems, hotel IT and technical support roles.

AI, WEB AND AUTOMATION EVIDENCE

AI-Assisted Websites, Hosting and Automation | Personal / Portfolio Work

2026 - Present

- Built and refined website concepts using AI-assisted workflows for page structure, copy, layout direction, responsive sections and QA feedback.
- Worked with hosting and deployment basics, live previews, file organization, troubleshooting and presentation-ready handoff concepts.
- Used AI to accelerate admin and technical work: documentation, content drafts, data cleanup, process maps, task lists and repeatable workflows.

Personal AI Assistant System / Undevved | Personal Project

2026 - Present

- Designed a personal assistant system with dedicated agents for career, research, content, university, operations and development tasks.
- Organized the system around structured capture, task routing, knowledge management, front-end/back-end planning, databases and automation ideas.

Uniform Management System (UMS) | Anantara The Palm Dubai Resort

Feb 2026 - Present

- Built a hotel operations tracking system for uniforms, bills, outlet spending, laundry costs, linen/napkins, income, net/gross income and analytics.
- Converted manual tracking into structured records and reporting visibility to reduce errors and support operational decisions.

CORE SKILLS

AI-assisted workflow design; prompt-driven website design; website building; hosting/deployment basics; automation planning; database design fundamentals; SQL/MySQL fundamentals; reporting dashboards; UMS; data cleanup; documentation; process mapping; Windows troubleshooting; Python and Pascal foundations; user support; hospitality systems.

PROFESSIONAL EXPERIENCE

Housekeeping Intern - Uniform Room Operations | Anantara The Palm Dubai Resort

Dubai, United Arab Emirates | Feb 2026 - Present

- Currently manage uniform room operations, including records, distribution tracking, laundry coordination and outlet-related laundry activity.
- Built and maintain UMS to track bills, laundry costs, outlet spending, income metrics and operational follow-up.
- Translate daily operational problems into structured tracking, reporting and workflow improvements.

PC Technician | WIKI Tunisia

Nabeul, Tunisia | Jul 2021 - Jul 2023

- Diagnosed and repaired desktop/laptop hardware, Windows issues, drivers, applications and user-reported technical problems.
- Installed and configured operating systems, essential applications and routine maintenance workflows for users.

Food and Beverage Intern | InterContinental Residences Dubai Business Bay

Dubai, United Arab Emirates | Oct 2025 - Feb 2026

- Supported luxury hotel service operations, order taking, guest communication, team coordination and hygiene standards.
